To The Buyers

In Mt. Vernon

Good, Dependable Merchandise is getting scarcer and scarcer every day and prices for next year, and even a few months from now, will be much higher than at present. This is not guess work but actual facts, as all classes of merchandise such as we carry has to be ordered several months in advance. So we are actually placing our orders now for Spring and Summer delivery and are paying consider erable advances in price. We even feel justified in telling you to lay in a supply for next winter, too, as we feel that all textiles will go even higher.

At any rate, DRY GOODS are cheaper today than they can possibly be in the next six months.

As an inducement to buy, we are not offering you greatly reduced prices, but quality merchandise that we bought many months ago, marked at a fair profit.

So we are justified in telling you to lay in your winter's supply now while stocks are full and prices as low as possible.

The Walker-McCrackin Co.

The Truth About Shoe Prices

The First of a Series of Four Frank Statements by the Severns Shoe Store

You can't have a world "Short on Shoes" without the demand being ers, decreased production due to shorter working hours, grasping for partial supplies at any price by foreign countries, increased cost of labor, and the higher price of all materials entering into shoe construction have all combined to create a condition little understood

Comparative Leather and Hide Prices

by the average wearer.

Here are the Facts which every purchaser of Shoes must face this Fall:

The Cost of Producing Shees has increased 122 per cent over 1915. The cost of labor employed in the actual making of Shoes has increased 80 per cent and upward over the labor cost of 1916.

The average price of Calfekins, Kid-skins and Oak Sole Leather in 1915 was 33c a foot. The same material in 1919 is \$1.08 a foot.

By comparing the lowest priced lines with the highest grade lines, an average of this fall's prices may be struck at from \$8 to \$14.

The management of the Severns Shoe Store feels that prices are too high for comfortable operation. and being the last connecting link between producer and consumer, will present a digest of facts and figures for consideration by the public who, in part, look to him for relief from a situation over which

Every possible endeavor is being made to hold down the cost to the consumer, and the Severns Shee Company is conducting its business on the same percentage of profit as in the year gone by, considering themselves fortunate to average a net return of 7 per cent on their sales.
